

SUCCESS NET

NUTS & OLIVE NET / FRUIT HARVESTING / COLLECTING NETS

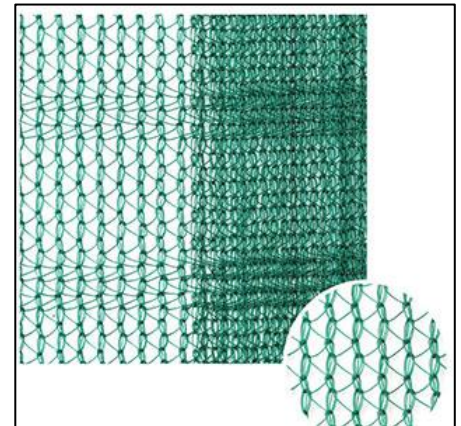

Harvesting the fruits is an economical problem for the fruit crop growers due to high labour cost and their requirements. A fruit after falling on ground left for too long period get deteriorate quickly therefore it require simple and easy system is to harvest the falling fruits. Harvesting the fallen fruit safely an extruded plastic is net used which is cost effective and simple to use. Easy installation is done by stretching the harvesting net under the plants few days before ripening or fall. Harvesting net is place above the ground which allows the fresh air to fruits and prevent from decay.
